

Footpath report

Over the year issues have been addressed where fallen trees/branches have obstructed the footpaths. Signs have been trimmed round where next to hedges and fingerposts replaced and posts reinstated.

I cut all the footpaths on our land and adjacent parishes throughout the summer months to make for easy walking and help define where the footpaths are.

Tree Warden report 2024

With high winds over the winter several branches were blown down, these were cleared up
The newly planted trees at the hall and farm continue to grow well and should be there for the generations to follow.

A large number of acorns have been planted so these will be planted out when large enough.
