Hello

Since RMI and Dragon Engineering have moved to the park on Wattisham Road not only have the lorries and vans increased but so have the idiot drivers. I caught one a few months ago driving directly at my Guinea Fowl and spoke to him in the park at RMI. Today someone has run over 2 of them on a completely straight bit of road near Cedars House. We've had Guinea Fowl here for nearly 20 years and never had a problem. In the last few weeks alone there have been 3 deer, 2 badgers and the 2 GF's run over.

How do we go about making this a quiet road?

There are also regular disagreements between lorries and cars outside our house and people refuse or cannot back. Sometimes it's like living at Piccadilly Circus.

We would really appreciate your help.

Kind regards
