### **New plan sets out how Suffolk will prevent and respond to COVID-19 outbreak**

A plan which sets out how Suffolk would prevent and respond to a localised outbreak of COVID-19 was published on 30 June.

Suffolk's Local Outbreak Control Plan will be triggered where there are suspected or confirmed COVID-19 outbreaks in any setting or community within the county.

The plan, a requirement of Government of all local authorities, outlines measures to prevent, manage, and contain outbreaks of Coronavirus and protect the public's health. It builds on existing relationships and processes in place with partner agencies across Suffolk.

The plan outlines how complex cases will be managed in more than 30 high-risk places, locations, and communities, particularly care homes and schools. It also outlines local testing capacity, use of data to identify and proactively manage outbreaks, and contact tracing in complex settings. An outbreak is defined when there are two or more cases in usual level for a particular place and time.

Suffolk has received £2.79million from a £300million Government fund to support delivery of the Local Outbreak Control Plan.

### **Suffolk's resilience partners continue to provide PPE equipment where most needed**

As Suffolk's response to the Covid-19 pandemic enters its fourth month, the team set up in March to source and distribute personal protective equipment (PPE) to support service providers across the county continues to operate from Suffolk County Council's offices in Ipswich.

To date, this PPE 'cell' of the Suffolk Resilience Forum (SRF) has distributed over 2.3 million items of PPE across Suffolk. Over 1.9 million of these items have been distributed for use in the care sector to support some of Suffolk's most vulnerable residents.

This equipment is directly supporting a range of staff every day, providing them with the masks, gloves and other disposable protective items needed to ensure safe working and effective infection control in care settings, social care, special schools, emergency services, and health organisations.

As service providers increase contact with residents and reopen, or plan for buildings to reopen in weeks to come, Suffolk's PPE team will continue to purchase and distribute equipment where there is a shortfall in supply, or where organisations identify an urgent

### **Looking after the vulnerable is top priority**

**Article by Councillor Beccy Hopfensperger, Cabinet Member for Adult Care.  
Published 23 June 2020.**

Nationally the focus of Covid-19 within the care sector has been on care homes. In Suffolk, we recognise that the experience is the same in all care settings, including extra care housing and supported housing, although the prevalence has not been as great. Care settings have been on the frontline in terms of our local response to Covid-19. News of cases, the need for testing, and sadly people passing away as a result of this virus, has been widely reported.

I want to share what has been happening within homes to protect residents and give an update on the support the county council is continuing to provide care homes as they face this challenge.

While we are seeing a gradual decrease in the number of cases within Suffolk's care homes, and the number of deaths due to Covid-19 appear to be reducing, providers are still in the response phase of this pandemic.

Suffolk's care homes continue to care for residents with the utmost professionalism and kindness. They are following national guidance regarding social distancing, hygiene standards and the correct use of personal protective equipment (PPE). Testing is available for all care homes - for the entire home, including staff and residents who are not displaying any symptoms.

Ahead of a national testing site being available, we started testing residents in care homes. Since testing began in mid-April, over 2,300 people have been tested across all care settings and testing continues.

With more testing taking place, infection control and prevention measures can be more effective.

The county council, with its health partners, continues to have daily contact with care homes to support them and respond to their needs and concerns. This support has included help to source agency staff where there is staff absence, obtaining PPE, a dedicated infection prevention and control enquiry line, and a package of financial support.

While providers are responsible for sourcing their own supply of PPE and financial support has been provided to help meet the additional costs, the Suffolk Resilience Forum has supplied care providers with 1.7 million items of emergency PPE when they have encountered difficulty in sourcing their own supply.

The number of people who have died in care homes in Suffolk due to Covid-19 is decreasing on a weekly basis. However, this doesn't take away from the fact that people have died because of this virus. It is a tragedy that families are losing their much-loved relatives and friends to this virus, and my deepest sympathies and condolences are with those who are grieving during this most difficult time.

In Suffolk, we are continuing to see a higher percentage of Covid-19 related deaths within care homes compared to some other areas. The reasons for this are complex, but factors we think are contributing to this are more people choosing to die in their usual place of residence and the high number of nursing beds that we have within care homes. These provide care for people with complex care needs who may be approaching the end of their life, and I would like to assure people that we have very good practices for providing end of life care in Suffolk.

Dying within a care home setting often reflects a person's wish to remain in their usual place of residence, in comfortable surroundings, with people around them who are familiar, as opposed to being in an unfamiliar hospital setting.

Although we no longer have any council-owned care homes in Suffolk, they are all privately owned and run, the county council still considers looking after the most vulnerable to be its top priority. The council is standing shoulder to shoulder with our care providers as we continue to face this crisis, and I want to take one final moment to praise their monumental efforts and their continued dedication and professionalism. The kindness and warmth that they show our most vulnerable each day, despite the pressures they face, is deeply moving.

I would ask people to please do what they can to protect our most vulnerable by continuing to follow government guidance around social distancing and hygiene to reduce the spread of the virus in our communities. Thank you for doing your bit and, please, Stick With It Suffolk.

## [Other news](#)

### **First business benefits from council's free solar panel scheme**

A Lowestoft-based charity is the first organisation to benefit from free solar panels, as part of Suffolk County Council's Renewable Energy Fund.

Nirvana Health and Fitness, on Pinbush Road in Lowestoft, is now hosting a 70kWp solar panel installation and is benefitting from zero-carbon electricity.

The council's £400,000 Renewable Energy Fund is open to eligible businesses looking to reduce their energy costs and carbon footprint through solar power. Successful applicants will have solar panels supplied and installed for free.

Once the panels are installed, the business is sold electricity at a better rate than their existing tariff, so they will see immediate savings.

The Fund itself benefits from income generated by the sale of the solar-generated electricity. This means money goes back into the pot, allowing more solar panel applications to be considered by the Fund and installed across Suffolk.

### **Better Broadband for Suffolk reaches 100,000th customer as third phase contract is agreed**

More than 100,000 households across Suffolk are already using faster broadband, thanks to the council-led Better Broadband for Suffolk programme.

The partnership - between Suffolk County Council, Openreach, the Department for Digital, Culture, Media and Sport (DCMS), the New Anglia Local Enterprise Partnership (NALEP) and local councils – has made faster broadband available to around 150,000 premises since being launched in 2010.

It means the current total superfast broadband coverage in Suffolk stands at more than 96 per cent, with plans currently in place to reach 98 per cent coverage before the end of the year.

The team has plans to go even further, after announcing, on 3 June, an additional phase of work to provide connectivity to approximately 5,000 more premises, including over 550 businesses, in some of the most rural parts of Suffolk.

The work will be carried out by Openreach – operator of the UK's largest phone and broadband network, used by the likes of BT, Sky, Plusnet, and TalkTalk – and is set to start as soon as deployment under the current contract ends. Work will continue until September 2022.

Faster broadband provides many benefits including staying in contact with friends and family through video conferencing services, easier web browsing and online shopping, the ability to stream high definition video, and work from home. Covid-19 has led to many of these benefits becoming even more crucial during times of social distancing and will have a large part to play during the recovery phase.
